Luca Farrugia

Future MCAST
Student

About Me

A 16 year old who recently just finished with his secondary education actively researching a Creative Arts courses at MCAST. Values efficiency and clear information over decorative design. Frequently frustrated by confusing navigation and slow loading times when trying to compare course options

Key Needs & Goals

- Quickly find and compare listings and specifications.
- Access clear admission requirements and prospectus information.
- Contact specific departments with course-related questions.
- View campus facilities and student life through images.

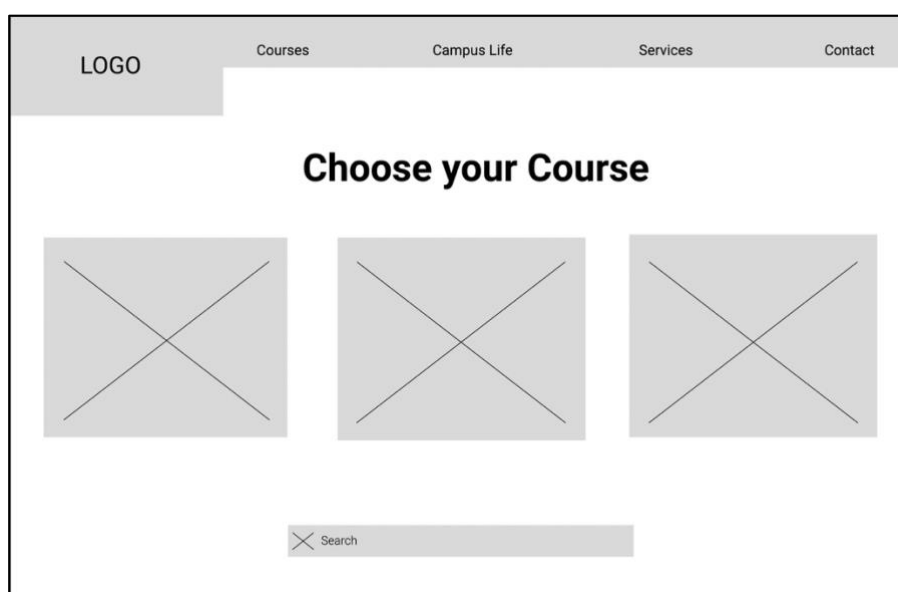

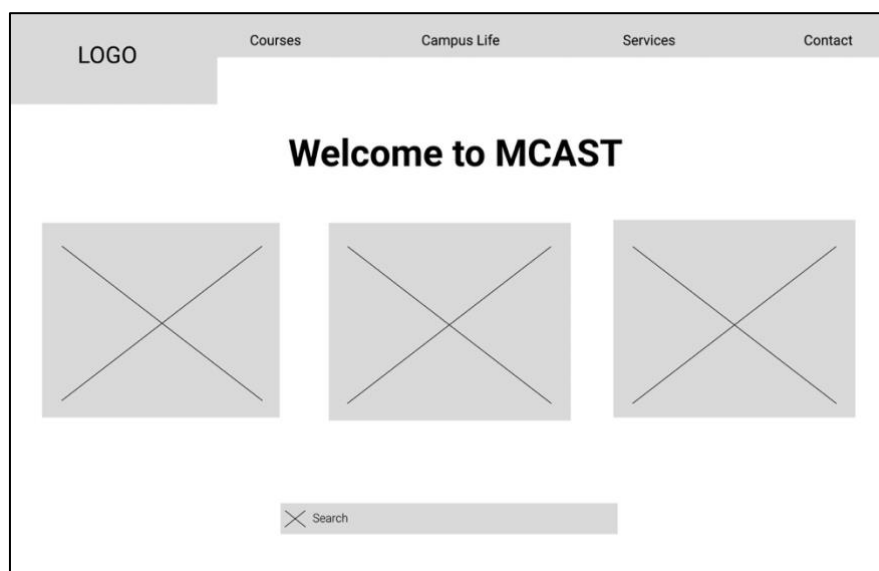

Frustration Points

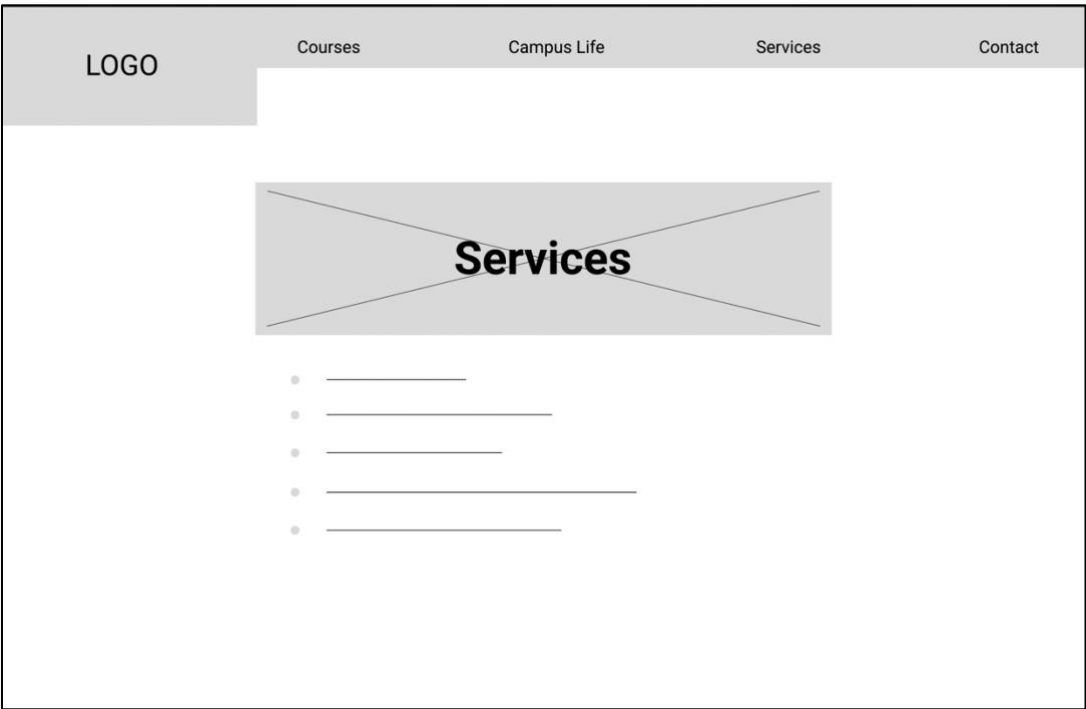

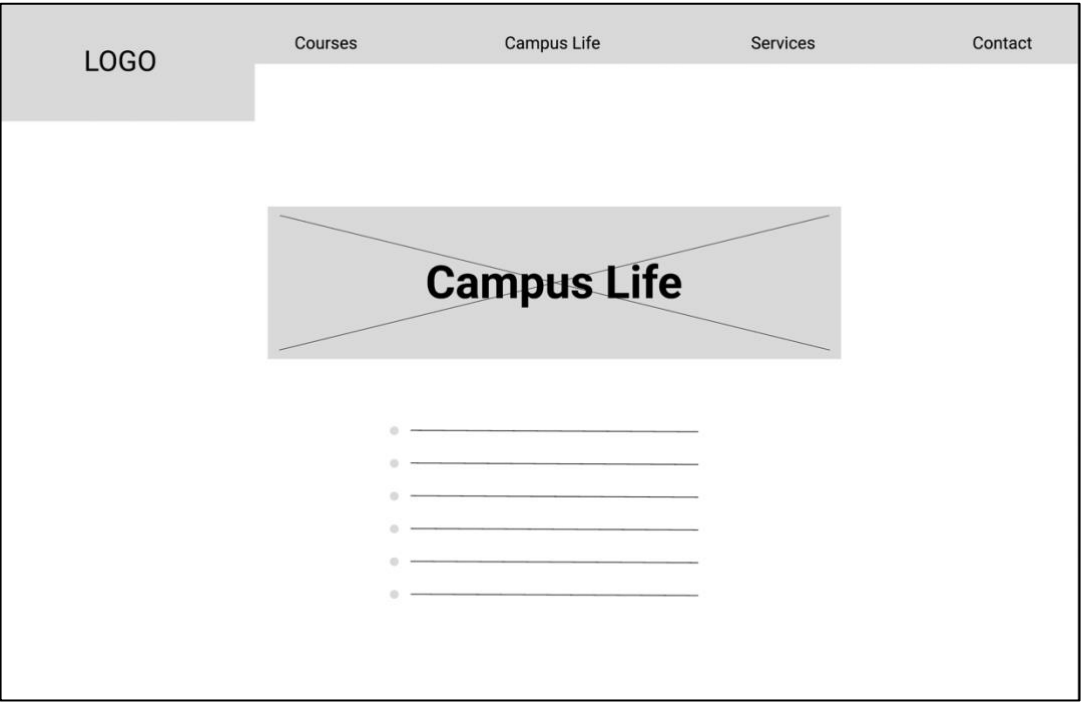

- "Navigation is bad" - gets lost trying to find course details.
- "Loading time and outdated information" - wastes time waiting for slow pages.
- "Unclear navigations to certain places" - can't find contact information easily.
- "The website can get a little asymmetrical and lack of pictures make it an unenjoyable experience" - needs visual appeal and proper layout.

100-WORD ESSAY

The creation of Luca Farrugia was directly influenced by crucial survey data trends. The immense need for accurate "Course Listings & Details" and "Admission Requirements" formed his key objectives. His complaints about "bad navigation", "unclear navigation to certain places", and "slow loading times" are exact feedback from respondents who found the existing site difficult to use. Furthermore, the aim for a "modern and clean" and "simple and easy-to-use" design, with a focus on "getting to information as soon as possible," shaped Luca's character as a user who values efficiency and clarity over aesthetic flair.
